Environment | Policies

Impact on score ●●●●

0/100

A policy is a set of objectives that addresses specific sustainability issues. It shows a company's intention to reduce impact, mitigate risk or improve performance.

Improvement areas

High priority	Inconclusive documentation on environmental policies
Medium priority	Inconclusive documentation for policies on energy consumption & GHGs
Medium priority	Inconclusive documentation for policies on water
Medium priority	Inconclusive documentation for policies on materials, chemicals & waste
Medium priority	Inconclusive documentation for policies on product end-of-life
Medium priority	Inconclusive documentation for policies on customer health & safety
Low priority	No quantitative target on environmental issues
Low priority	Inconclusive documentation for policies on air pollution

Environment | Endorsements

Impact on score ●○○○

0/100

Endorsements are your company's public adherence or commitment to meeting objectives and principles defined by a recognized third-party organization.

Improvement areas

Low priority	No conclusive information on endorsement of external initiatives or principles on environmental issues
--------------	--

Environment | Measures

Impact on score ●●●●

75

/100

Measures are your company’s actions to support your sustainability policies and commitments.

Strengths

Adoption of cooling systems with reduced or recycled water consumption
Improvement of energy efficiency through technology or equipment upgrades
Periodical analysis on the volumes of major air pollutants or ambient air quality monitoring (testing levels of PM, NOx, SO2, VOC or heavy metals)
Noise preventative maintenance plan in place to replace equipment parts that have potential to create abnormal noise
Work processes or technologies implemented to mitigate emissions of VOC, SO2, NOx or heavy metals
Work processes or technologies implemented to mitigate emissions of dust and/or particulate matter
Work processes or technologies implemented to mitigate odor
Work processes or technologies implemented to mitigate noise
Environmental emergency measures in place
Training employees to safely handle and manage hazardous substances
Internal sorting & disposal of waste according to waste streams
Water risk assessments performed
Water audit
Wastewater quality assessment
Actions to prevent emissions of atmospheric pollutants and other environmental nuisances (e.g. noise, odor, vibration, road and light)
Regular noise measuring campaign (site boundary noise measurements undertaken)
Specialized treatment and safe disposal of hazardous substances or waste
Training of employees on waste reduction and sorting
Technologies or practices to recycle or reuse water
Training of employees on energy conservation/climate actions
Dedicated feedback channel on health & safety issues of products

Improvement areas

Low priority	Declares actions on environmental impacts from product or packaging end-of-life, but no supporting documents available
--------------	--

Environment | Certifications

Impact on score ●●●○

100

/100

Certifications confirm your compliance with international standards (for example, ISO 14001). They must be issued by an external certification body.

Strengths

ISO 14001 certified

Environment | Reporting

Impact on score ●●●○

50/100

Reporting is based on quantitative KPIs that measure your implementation of sustainability practices.

Strengths

Reporting on total water consumption
Reporting on total gross Scope 1 GHG emissions
Reporting on total gross Scope 2 GHG emissions (market or location based)
Standard reporting on environmental issues
Reporting on total weight of hazardous waste
Reporting on total weight of non-hazardous waste
Reporting on total amount of renewable energy consumed
Reporting on total energy consumption
Reporting on total weight of air pollutants
Total gross Scope 2 reporting value confirmed in supporting documentation
Total gross Scope 1 reporting value confirmed in supporting documentation

Improvement areas

Low priority	No information on reporting on total gross Scope 3 GHG emissions
Low priority	No information on reporting on total gross Scope 3 downstream GHG emissions
Low priority	Declares reporting on total weight of waste recovered, but no supporting documentation available
Low priority	Declares reporting on total amount of water recycled and reused, but no supporting documentation available
Low priority	Undertake external assurance or verification of your sustainability reporting
Low priority	Align your reporting with a sustainability reporting standard (such as GRI, ESRS, IFRS)
Low priority	Conduct a materiality analysis to identify relevant sustainability issues

Vietnam Rubber Company Huy Anh Rubber Co., Ltd. strengthens its EU market presence with sustainable rubber production

agrospectrumasia.com | 24 Sep 2024

Huy Anh Rubber partnered with KOLTIVA to achieve EUDR compliance, committing to sustainability and zero deforestation in its supply chain. This collaboration reinforces Vietnam's dedication to environmental preservation in the rubber sector, which is the world's third largest exporter. Huy Anh operates three processing plants and plans to expand cultivation significantly. KOLTIVA's solutions, including its KoltiTrace MIS mobile app, will enable Huy Anh to map 10,000 smallholder farmers, conduct risk assessments, and ensure traceable, deforestation-free transactions using satellite data.
